中学生用のインターネット掲示版で、あなたは「AI（人工知能）の利用」について次のような投稿文を見つけました。これを読んで、以下の問いに答えなさい。

Hi, I'm Jack, a junior high school student from the U.K. Today, we can see many kinds of AI apps. If we ask questions to them, they can give us the answers very quickly.

Many people use AI for work or studying. For example, my father is a teacher. He often uses them when he makes teaching plans. Another example is about my sister. She studies Korean, but there are no Korean people around her. So, she downloaded an AI app on her smartphone. The app understands Korean. She speaks to her phone in Korean, and then, it speaks back to her. She enjoys talking with it. I think AI is very useful to everyone.

I think junior high school students should use AI for their homework, too.
Do you agree with me?
